

Training Programs

Crime Laboratory and Crime Scene Programs:

Forensic Analysis, Consulting, and Training (F.A.C.T.) provides training opportunities in various formats to meet your needs. From hands on mock crime scene analysis to online programs, the instructors of F.A.C.T. can offer quality training in a variety of disciplines, tailored to fit your individual or agency needs. Classes can be conducted as an informal seminar with your staff that lasts a single day or act as part of a breakout session during your scheduled training. Additionally, 24 to 40 hour training courses are offered that combine lectures, case studies, and practical exercises.

Topics include:

- ◆ Expert Witness Training
- ◆ Crime Scene Processing and Analysis
- ◆ Crime Scene Photography
- ◆ Shooting Incident Reconstruction
- ◆ Bloodstain Pattern Analysis
- ◆ Firearm and Tool Mark Examination
- ◆ Latent Print Examination
- ◆ Crime Laboratory Leadership Training

F.A.C.T. Leadership Institute:

F.A.C.T. Leadership Institute offers comprehensive leadership training provided by proven leaders in the field of forensic science. This 40 hour course is delivered in a mixed model format, designed specifically for forensic science professionals who are or will soon be the leaders of your organization.

Crime Laboratory Analysis

Forensic Analysis, Consulting, and Training provides a variety of crime laboratory services focusing on a holistic, interdisciplinary approach. Utilizing analysts and examiners that possess a crime scene to courtroom mentality, each case is evaluated start to finish – from how evidence was collected at the scene through the presentation of the final analysis at both criminal and civil trials. The analysts and examiners of F.A.C.T. specialize in the following fields:

- ◆ Crime Scene Investigation
- ◆ Crime Scene Reconstruction
- ◆ Shooting Incident Reconstruction
- ◆ Bloodstain Pattern Analysis
- ◆ Firearm and Tool Mark Examination
- ◆ Latent Print Examination

Expert Witness Testimony

Forensic Analysis, Consulting, and Training utilizes court qualified experts in their respective fields with the knowledge and experience to succeed on the witness stand. Additionally, the experts at F.A.C.T. can help prepare your personnel for facing opposition experts by providing education in specific fields, reviewing expert reports, and understanding accreditation standards.

Case Review

Utilizing our holistic, interdisciplinary approach, Forensic Analysis, Consulting, and Training conducts case reviews using experts in the field, coupled with proven investigators. Case reviews analyze the many facets of an investigation, including the investigative approach, crime scene processing, evidence submission for laboratory analysis, and the use of specialized forensic disciplines. We can also assess the investigation for its adherence to best practices, and offer recommendations to correct and improve the investigative approach for the most accurate and thorough evaluation of evidence. Since the evaluation and analysis of physical evidence drives an investigation and helps prove or disprove statements made by suspects, witnesses, and victims, F.A.C.T. can review investigative reports, interviews, and other aspects of the case to determine if the physical evidence and the investigative findings agree.

For more information regarding the types of analysis conducted or to receive a preliminary case assessment please contact us today.
